DAILY REPORT - MONDAY 9 JULY 1951

RGF:END

Tests on the radio boat, the JUANITA, are now under way. The dockside tests were satisfactory, as were ground wave tests at 35 miles. However, during the first three nights the signals were not heard at a distance of 200-225 miles. The field attributes this to extremely heavy interference over the entire radio band.

JHEDICT, QKBBOLL, QKSTAIR

Negative.
